Event Registrations, Timezone, Recurring Events

Surfcamp-Events Extension

How we approached the Task

1. **Analysed** existing extensions
2. Find **USPs** and identified **problems**
3. Defined and **planned** our scope and features
4. **Develop** our own extension

Recurring Generation Type

daily

Select the type of recurring you want to generate.

Selected weekdays

all days

Select the type of recurring you want to generate.

Selected Days of month

1-31

Select the days of the month you want to generate. Can provided as a comma separated list or as range like 1-15.

Delete Appointment (Recurring)

Add Appointment (Recurring)

Future Ideas

1. **Extend Registration Flow:** Emails, Deregistration, ...
2. **Practical Usability:** Advanced editing options for Recurring Events
3. **Core Integration:** Integrate some features in Core (Timezone)
4. ...

Lessons Learned

1. Timezones:

- No native solutions available
- Common & complex problem

1. **Planning:** Taking time to plan pays off

2. **Communication:** Effective communication is key to success

Personal Takeaways

1. **Creating a project** from scratch is fun
2. The TYPO3 **Community** is incredibly helpful
3. You achieve more **working as a Team**
4. **Workation** is worth a try

Thank you!
